THE SYMPTOMS OF LIVER COMPLAINT ARE MEASURABLE AND PAIN IN THE SIDE. Sometimes the pain is in the shoulder, and is mistaken for rheumatism. The stomach is affected with loss of appetite and sickness, bowels in general, sometimes altered, with lax. The head is troubled with pain, and dull, heavy sensation, considerable loss of memory, accompanied with painful sensation of having left undone something which ought to have been done. Often complaining of weakness, debility, and low spirits. Sometimes many of the above symptoms attend the disease, and sometimes only a few of them; but the liver is generally the organ most involved. Cure the Liver with

W. M. Landreth is the Superintendent and agent who will call on all those wishing any thing in the Furniture line and is authorized to make all contracts for me, connected with the business. Be sure and call before purchasing. I desire where and you will get the worth of your money. S. LANDRETH, Proprietor, JOHNSON CITY, TENN. 7000202

WASHINGTON, March 12, 1871. Editors Herald and Tribune: In a former communication I promised I would give you something more about South America and the remote parts of the earth which I have visited within the last three years. I have described to you my joy, on my arrival at the end of Broadway, when again placing my foot on our native soil, which has aroused so sensibly the notions of the sublime in the mind of our contemporary of the Nashville Republican and Banner—this is all natural enough, when carried away by a flash of the imagination, which exceeds the ordinary powers of description. Still when we describe the contrast between the remote and desolate Islands of the South Atlantic Ocean, with the "land of our nativity," the Banner will find a more prolific subject for his contemplation in the further description of the Falkland Islands. With their naked rocky mountains, hills and towering isolated peaks of rugged stone, presenting all over the vast domain, presenting to the eye and mind a panorama of the wildest desolation, and to the spectator far away from country, home and friends, all the realities of exile, which demands all the resolution from the stoutest heart which the situation can summon or command. The Falkland Islands number two hundred and one and make an area (in the aggregate) of six millions four hundred acres, nine tenths of which are rock, without a tree, shrub or plant. Perpetual winter and never ceasing gales of wind every day in the year. No spring time nor harvest or change of seasons. The cold is often unendurable. Seamen come in from wrecks at sea with feet and hands frozen. This consular post is only important to American seamen, who meet with disaster about Cape Horn. There is no commerce with the United States, and while the consul is looking after the welfare of the American sailor upon the sea, he is suffering disaster to himself upon the land for want of a salary commensurate with a comfortable support. More anon. J. POWELL, RADICAL. WOOLEN GOODS! For the Herald and Tribune. The Doe River Woollen Manufacturing Company have in their possession a patent loom, which clips the wool right from the sheep's back, and scores, picks, cards, spins, weaves, and manufactures it into wearing apparel, all with one instantaneous movement of the shuttle! Every pick of that little wonder-working implement, causes coats, pants, hats, vests, caps, socks, dresses, cloaks, &c., to drop, READY MADE, from the loom. And the beauty of it is, that each garment will fit, to a "T," any individual who tries it on, just as perfectly as if made purposely for that identical person. These patent goods are of the most vivid and beautiful colors imaginable, for the loom, instead of being run by pure water power, is propelled by a stream of patent dye, which is made by a combination of portions of all the material ever used for coloring wool, and this patent loom has the property of arranging all these mingled dyes into the most charming and bewitching styles, shades, and hues imaginable. To get an idea of their peculiar beauty, just take one of the bright, east of Rainbows, and take this about half as much of the essence of the most gorgeous sun-set hues, then stir into this solution two quarts of the unrivaled beauty of the Government Blue, and you will have the rarest and brightest flowers, and varnish the whole with the softest shade of moonlight, just tinged with a ray of pure sunshine. These newest of new goods, are at present all the rage in nearly every inhabitable part of the globe, and the Company have sent up in their new Balcon, which is made of Merino Wool, and is also a product of this wonderful loom, several million of boxes of these goods to the inhabitants of the planets, Venus, Mars, and Jupiter. They also sent on an invoice to the Sun, but the heat was so intense that the cargo was all converted into gas ere a landing upon that luminary could be effected; and the aeronaut himself barely escaped with his life. He owes his preservation to the fact of having in one of his pockets a Photograph of this powerful loom. This great invention has hitherto been kept a profound secret, lest the establishment should be so thronged with curiosity-seekers, that the Company would not be able to proceed with their regular business. But now, having for a time supplied all foreign demands, they are willing to open their doors to the public, and to furnish Carter County and vicinity with such of these goods, as the people may desire, and upon the most reasonable terms. To every purchaser of any article is given a Photograph of this Pat Loom, and its charming Lady Weaver, both of which are perfect marvels of beauty and loveliness. For further particulars inquire of "SOMEBODY."

HUGH T. TARGGAT, Attorney at Law, AND Solicitor of Claims, WASHINGTON, D. C. All Business requiring the services of an Attorney at the seat of Government promptly attended to. 7000251

MILITARY, NAVAL AND GENERAL AGENCY. Chas. F. McGill, Attorney at Law and Solicitor for Claimants, Washington, D. C. (Established 1852.) Continue to attend to Claims, especially those growing out of the late war, before the several Departments and Courts of the United States, and the Soldiers' Officers of every grade, Seamen and Marines, and the Widows, Children and heirs-at-law of those who have been killed or died from wounds or sickness contracted in the service. Re-claiming and Quartermasters' Claims; Claims for Sick and Invalid Pay; Claims for Desertion, desertion, or destroyed by Government; Horse, Cattle, Poultry, Corn, and all kinds of property taken for Government purposes in the Northern and Southern States; Mail Contractors' Claims, and the Claims of late Post Masters, North and South. Claims for property seized by the Freedmen's Bureau Treasury Agents, and for the recovery of all kinds of property, promptly attended to. Particular attention given to Claims for a Refund of Internal Revenue Tax and Claims for the recovery of property, and paid, Railroad accounts and Claims on Foreign Governments. Bounty and Bonuses. And obtained under all existing laws, and laws that may hereafter be made. Claims before the Departments, Congress, Court of Claims, and Supreme Court, in the hands of distant attorneys, requiring the service of an agent in Washington, are required to be made by the agent, and are prosecuted on the most liberal terms. Suspended cases, of whatever nature, whether of long standing or recent date, are solicited; also, pensions, suspended by reason of the late war, revived in the several States. Our long residence at the seat of Government, familiarity with the offices, and thorough knowledge of the laws, in all the Departments, well qualify us for the prompt and energetic discharge of all business placed in our hands. And the beauty of it is, that each garment will fit, to a "T," any individual who tries it on, just as perfectly as if made purposely for that identical person. These patent goods are of the most vivid and beautiful colors imaginable, for the loom, instead of being run by pure water power, is propelled by a stream of patent dye, which is made by a combination of portions of all the material ever used for coloring wool, and this patent loom has the property of arranging all these mingled dyes into the most charming and bewitching styles, shades, and hues imaginable. To get an idea of their peculiar beauty, just take one of the bright, east of Rainbows, and take this about half as much of the essence of the most gorgeous sun-set hues, then stir into this solution two quarts of the unrivaled beauty of the Government Blue, and you will have the rarest and brightest flowers, and varnish the whole with the softest shade of moonlight, just tinged with a ray of pure sunshine. These newest of new goods, are at present all the rage in nearly every inhabitable part of the globe, and the Company have sent up in their new Balcon, which is made of Merino Wool, and is also a product of this wonderful loom, several million of boxes of these goods to the inhabitants of the planets, Venus, Mars, and Jupiter. They also sent on an invoice to the Sun, but the heat was so intense that the cargo was all converted into gas ere a landing upon that luminary could be effected; and the aeronaut himself barely escaped with his life. He owes his preservation to the fact of having in one of his pockets a Photograph of this powerful loom. This great invention has hitherto been kept a profound secret, lest the establishment should be so thronged with curiosity-seekers, that the Company would not be able to proceed with their regular business. But now, having for a time supplied all foreign demands, they are willing to open their doors to the public, and to furnish Carter County and vicinity with such of these goods, as the people may desire, and upon the most reasonable terms. To every purchaser of any article is given a Photograph of this Pat Loom, and its charming Lady Weaver, both of which are perfect marvels of beauty and loveliness. For further particulars inquire of "SOMEBODY."

WASHINGTON, March 12, 1871. Editors Herald and Tribune: In a former communication I promised I would give you something more about South America and the remote parts of the earth which I have visited within the last three years. I have described to you my joy, on my arrival at the end of Broadway, when again placing my foot on our native soil, which has aroused so sensibly the notions of the sublime in the mind of our contemporary of the Nashville Republican and Banner—this is all natural enough, when carried away by a flash of the imagination, which exceeds the ordinary powers of description. Still when we describe the contrast between the remote and desolate Islands of the South Atlantic Ocean, with the "land of our nativity," the Banner will find a more prolific subject for his contemplation in the further description of the Falkland Islands. With their naked rocky mountains, hills and towering isolated peaks of rugged stone, presenting all over the vast domain, presenting to the eye and mind a panorama of the wildest desolation, and to the spectator far away from country, home and friends, all the realities of exile, which demands all the resolution from the stoutest heart which the situation can summon or command. The Falkland Islands number two hundred and one and make an area (in the aggregate) of six millions four hundred acres, nine tenths of which are rock, without a tree, shrub or plant. Perpetual winter and never ceasing gales of wind every day in the year. No spring time nor harvest or change of seasons. The cold is often unendurable. Seamen come in from wrecks at sea with feet and hands frozen. This consular post is only important to American seamen, who meet with disaster about Cape Horn. There is no commerce with the United States, and while the consul is looking after the welfare of the American sailor upon the sea, he is suffering disaster to himself upon the land for want of a salary commensurate with a comfortable support. More anon. J. POWELL, RADICAL. WOOLEN GOODS! For the Herald and Tribune. The Doe River Woollen Manufacturing Company have in their possession a patent loom, which clips the wool right from the sheep's back, and scores, picks, cards, spins, weaves, and manufactures it into wearing apparel, all with one instantaneous movement of the shuttle! Every pick of that little wonder-working implement, causes coats, pants, hats, vests, caps, socks, dresses, cloaks, &c., to drop, READY MADE, from the loom. And the beauty of it is, that each garment will fit, to a "T," any individual who tries it on, just as perfectly as if made purposely for that identical person.
